With more than 64,000 U.S. locations, the \$40 billion pizza market is a rare growth opportunity: NPD Group projects a 20% increase in carryout and delivery by 2018.

Reach this growth market with the #1-rated POS for pizza and delivery.

How well do your current POS products handle 2-for-1 pricing? Complicated coupons? Delivery dispatch? Can they manage deferred orders and track inventory for millions of create-your-own pizza combinations? Most systems can't.

That's why more leading pizza chains choose SpeedLine.

Expand your market and earn more.

- Attractive margins
- No recurring partner fees
- Comprehensive training

 www.xsilva.com

LightSpeed is Xsilva's elegant retail platform for Mac that blends innovative functionality with a stylish and intuitive look and feel. It combines a point of sale (POS) solution for front-counter retail with streamlined, powerful back-office functions such as inventory management, order processing, and billing. Version 3.0 features a new point of sale screen, a host of new features for multi-store retailers, including a powerful new solution called Multi-Store Pro, and expanded support for Xsilva's e-commerce solution, LightSpeed Web Store.

Xsilva works closely with our worldwide network of resellers to close leads distributed by our sales team and to act as local experts in the implementation of LightSpeed solutions. These relationships are a key factor in the growing success of LightSpeed as a valuable business solution for both single stores and multi-store chains.

Xsilva's goal is to pair qualified leads with knowledgeable LightSpeed resellers in their local market whenever possible.
